

J2, J3 and J4 Science

What's it made out of? (Chemical Sciences)

Providing opportunities for students to explore through hands on activities what things are made of and the properties they possess.

Lesson 1

Use the Inventor scavenger hunt as a guide to explore your house. Discuss what you find with an adult and record your findings.

Lesson 2

Draw a walking map of where you found your scavenger hunt items.

Lesson 3

Read the story of The Three Little Pigs. Draw the three different houses the pigs made.

Lesson 4

Find 6 items around your house and sort them into different groups. ****REPORT****

Lesson 5

Choose one of your scavenger hunt items and complete the detailed report "Tell Me About It".

Lesson 6

Use a magazine, newspaper or catalogue to find items that are made out of wood, paper, plastic or glass.

Lesson 7

Mystery Box! Describe through touch items in a box.

Lesson 8

Conduct an experiment using items from around your home.

Lesson 9

Using materials around your home create a WATERPROOF piece of art to go outside.

****REPORT****

Lesson 10

What clothes keep us warm or cool?
